DEFENCE TECHNOLOGY.
FOUNDED ON SCIENCE.

AMDC

AMDC is an independent engineering service provider with core competencies in the defense sector. Our focus is on advising the German Armed Forces and allied military forces in matters related to military research and technology.

Working Student UAS Technician (m/f/d)

Do you enjoy hands-on work with unmanned aircraft systems? Join our team to assemble, maintain and troubleshoot our UAVs, while helping us establish reliable and well-documented technical processes.

YOUR MISSION:

+ Assemble, inspect, maintain and repair our UAVs and associated components
+ Assist with troubleshooting and functional checks to support flight readiness
+ Document maintenance work, repairs, component replacements and configuration changes in a clear and traceable manner
+ Help develop, standardize and improve maintenance procedures, checklists and configuration management processes

WHAT YOU`LL BRING:

+ Technical studies (e.g. Aerospace Engineering, Mechanical Engineering, Systems Engineering, or a related field)
+ Hands-on experience assembling, maintaining or repairing UAVs
+ Experience with ArduPilot or PX4 and ground control software such as Mission Planner or QGroundControl
+ Very good written and spoken English
+ Confident use of common office applications and ability to prepare clear, traceable documents
+ An independent, reliable and detail-oriented working style, combined with a collaborative mindset

WHAT WE OFFER:

+ Working student position with up to 20 hours per week
+ Competitive, above-average compensation
+ Work place: Ismaning
+ Start date: as soon as possible

Ready to take your passion for UAVs to the next level? We'd love to hear from you!
